

Brand: Ranger
Model: RB-1ST
Description: Small Material Bender

Bending All Manner of Small Materials

The RB-1ST Bench Top Mini Bender is specially designed for bending all manner of small materials in the shop or in your garage at home. Adapts to a range of sizes and styles so you can skillfully bend round bars, flat bars or tubing. Ideal for creating small diameter tube lines, brackets and hangers, this small materials bender is a must-have for muffler shops and specialty fabricators.

Features

- Heavy, solid steel construction
- Perfect for bending solid, round and flat steel bars or tubing
- Includes bracket for installation on bench-top or machinery
- Bends virtually all small tubing and square stock sizes
- A must-have for muffler shops and specialty fabricators
- Perfect for creating small diameter tube lines, bracket varieties and hangers
- Quick-change tooling / multiple, pre-machined sizes in the die
