

Brand: Ranger

Model: RH-50PM

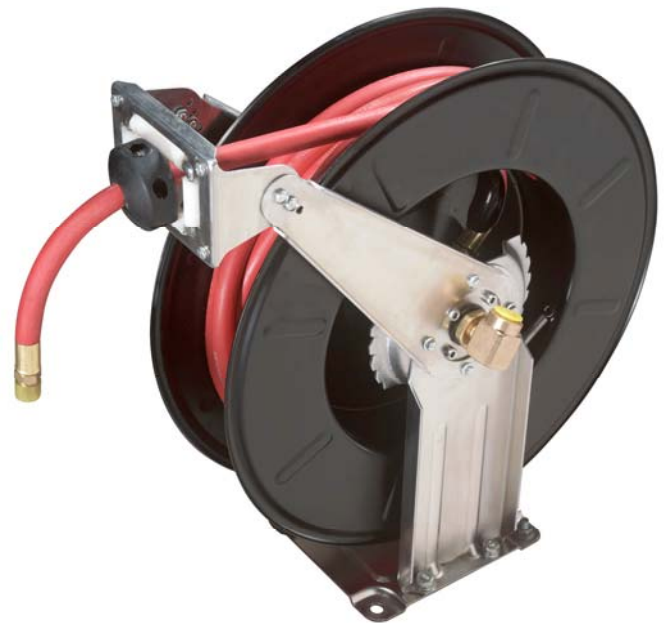

Description: Dual Support, Spring Rewind Hose Reel and Super-Duty, 50' / 3,000 psi Hose

Ranger Hose Reels, Time-Tested Superior Design

Ranger spring-driven hose reels have a long history of dependability and trouble-free performance. Their compact, space-saving design and heavy-duty construction make them very rugged and virtually indestructible. The RH-50PM is an especially durable reel, further reinforced by a dual support leg base, guide arms and axle. Offering everything you look for in a reel, it unrolls the hose when you need it and conveniently rewinds it without hassle when you don't. The RH-50PM ships with a super-duty 50', 3,000 psi hose capable of pumping air, water and oil. It's easy to see why Ranger hose reels are the preferred choice among automotive service industry professionals: time-tested components, superior design and quality craftsmanship.
