

Provides a **FASTER**  
 more **ACCURATE**  
 and **EASIER**  
 resurfacing capability **THAN**  
**ANY OTHER**  
 brake lathe in it's class.

The ruggedly-built RL8500 has an infinitely variable speed controller able to turn rotors and drums faster providing one-cut, micro-finish execution every time you use it.

Revolutionary, new design uses independent DC motors that eliminate complex mechanical gear boxes as well as tool-tip vibration and chatter.

Infinitely adjustable feed rates allow easy modification to cut speeds whether speeding through an initial rough cut or performing a one-pass micro-finish.

Say Goodbye  
 to Inefficient  
 Gear Boxes  
 Forever!

Independent DC Motors  
 Eliminate Gear Box Pitfalls

Quick Rotor to Drum  
 Changeover
