

Brand: Ranger

Model: RST-500ES

Description: 1,500-lb. Engine Support

Wheel Well to Wheel Well Support

The engine is the heart and soul of a vehicle. Don't trust its care to anything but Ranger. The RST-500ES is designed for unparalleled adaptability: threaded adjustable chain hooks and telescoping side foot-pads adjust to all manner of engine compartments. Wheel well to wheel well support provides a solid foundation for up to 1,500 lbs. of engine while you're working on the transmission or dropping a sub-frame. This engine support is both easy to use and a real time saver. And we all know that in this business, time *is* money.

Features

- Straddles inner fender wells to support engines
- Adjusts to fit all vehicles
- Precisely positions engine for easy gear box and transmission removal
- Perfect for 4 and 6 cylinder engines
- Rubber foot pads prevent damage and holds load securely
