

You keep your clients rolling...

...we keep your business rolling.

Wheel Service Products

Brake Lathes – versatile, easy-to-use, safe and very durable. Our combination bench lathe is still America's favorite and our on-car lathe is the perfect solution for correcting problems without having to remove the rotor.

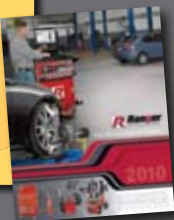

Tire Changers – handle the toughest, low-profile and performance tire / wheel combinations — even extra-large wheels and delicate alloys.

Vehicle Jacks – let Ranger do the heavy lifting. We provide industrial and automotive service pros with a remarkably durable line of hydraulic jacks designed to lift productivity, profits and tons of metal every day.

Wheel Balancers – used throughout the world in applications ranging from small single-bay shops to high-volume garages and dealerships. All Ranger balancers are built to minimize downtime, maximize shop productivity and deliver years of trouble-free service.

Your single most powerful tool isn't a tire changer or wheel balancer—it's a solid service reputation. We respect that. So when you buy a product from Ranger, you're tying your bottom line to quality equipment that will, before all else, protect your good name.

Ranger is your single source for wheel service products designed to reduce floor to floor times and virtually eliminate dissatisfied comebacks. Our broad spectrum of equipment choices include TPMS capable tire changers, wireless aligners, brake lathes and more. We're constantly pushing service technology forward so your clients always get the best.

After four decades of excellence, BendPak / Ranger has grown to be one of the world's largest and most trusted automotive service equipment providers. You have a name to protect. So do we.
