

Brand: Ranger

Model: TS-150

Description: Height Adjustable Tire Spreader

A Convenient Tire Spreader for any Garage or Shop

The Ranger TS-150 is an excellent air-powered tire spreader designed to service automobile tires and commercial truck tires. Perfect for tire inspection, buffing, cutting, dust suction, inserting tubes and patching.

The TS-150 Height Adjustable Tire Spreader quickly lifts tires to a convenient work height to make tire repairs infinitely more comfortable for the technician. The heavy-duty rollers permit tires to rotate freely, while the adjustable spreader forks accommodate both narrow- or wide-tread widths. Control operations, including tire lift and spread, are air-powered and use simple ergonomic air valves for operation. This convenient tire spreader is the perfect accessory for any well-functioning garage or shop.
