

It's About Time

Saving time to be exact – The Ranger® CRT380R Alignment System is a highly accurate, four-wheel, wireless alignment system for domestic and foreign cars and trucks. It features 8-CCD technology, Bluetooth® data transfer and our refined ProSpec Alignment software that was designed for simplicity and speed.

This unique combination of technology and user-friendly functionality enables any business owner, who is interested in providing alignment service as an additional profit source, to do so with minimal investment and training.
