Drip-Proof, Weatherproof & Foolproof Design

This optional, two-piece, full-length middle deck platform fits all BendPak HD-7 and HD-9 series [four-post lifts](#) and provides additional storage space. The lightweight aluminum decks transform your lift into a mezzanine lifting system. It increases square footage for storing motorcycles, ATVs and other garage clutter up and out of the way. Lightweight aluminum construction makes removal and installation a cinch, so you can always have hassle-free access to the vehicle underside. They also prevent potentially harmful fluids from dripping below the lift platform. Rest easy knowing that bottom vehicles, equipment and flooring are protected from nasty spills. An attractive diamond plate finish provides a sure-footed, non-slip surface.

Features

- Options to fit all HD-7 and HD-9 Series lifts
- Solid aluminum construction
- Protects vehicles, equipment and flooring from harmful fluids
- Easy mounting / dismounting
- Additional storage
