Ranger Clip-on Wheel Weights Make Wheel Service Easy

Each weight class is sold in a set of 25, and most are made a little heavier than our stick-on wheel weights, so you never have to use a ton of steel weights to get the job done. If you're looking to save time and energy, all you do is clip the weight into place and you're done. Zero mess and zero cleanup. Your shop looks better already.

Of course, these [wheel weights](#) are 100% lead-free and environmentally friendly. They're also extremely durable and provide incredible hold on any wheel size.
