The QuickJack portable lifting system makes vehicle maintenance on and off the track convenient and lightning fast. The QuickJack can go anywhere and is easily stowed in the trunk or back seat of most cars. Bring it to the track, or drop it on your garage floor to perform routine maintenance in the comfort of your home, all in seconds.

The QuickJack replaces clumsy floor jacks and unstable jack stands with a safe, durable and convenient vehicle jacking and support system. Simply position the lightweight jack frames under the vehicle, push the raise button on the handheld pendant control, and in seconds the entire car is about 21” off the ground, ready for tire changes, chassis tuning or other maintenance.

The ruggedly built frames collapse to a low three-inch profile, so they fit where other jacks and lifts don’t. With QuickJack, practicality and portability become reality. Because the QuickJack is void of any cross members, it provides total undercar access and can be installed at a width that best suits the vehicle being raised.

You get it all:
- (2) Frame Assemblies
- (2) 150” Hydraulic Hoses
- (2) 28” Aux. Hoses
- (2) Frame Positioning Handles
- (1) Hydraulic Power Unit with Pendant Control 110V-AC Standard (Optional 12V-DC and 220V-AC Available)
