True King of Rolling Floor Jacks

The RBJ-30TL takes Ranger's air-hydraulic technology to the extreme. This is our most powerful garage [floor jack](#), easily managing a hefty 60,000 lbs. in the first phase position and 30,000 lbs. at the 12" max lifting height. The RBJ-30TL garage floor jack was designed for heavy commercial use and features a long "T" handle for easy positioning, as well as large rubber wheels for smooth maneuvering around the garage. Floor jacks as powerful as these essentially offer you the lifting power of a car lift without burdening your garage space. Two jacks working together can simultaneously lift a 120,000-lb. vehicle into the first position and a 60,000-lb. vehicle in the second position. For a compact hydraulic floor jack, we'd say that's pretty impressive.

While it's designed for heavy-duty commercial applications, this jack can be used to lift smaller vehicles with ease. This product offers infinite versatility up to the rated lift capacity, so it may be one of the last floor jacks you ever need!

Features

- Designed for heavy commercial use
- Air-hydraulic operation
- Lowered profile for low ground-clearance vehicles
- Hardened alloy-plated telescoping ram for maximum durability
- Heavy-duty steel saddle
- Large rubber wheels for easy maneuverability
- Compact design fits easily between tandem wheels
- Dead-man controls for safe operation
- Long "T" handle for easy positioning
- "T" handle can be locked in three different positions
- Double-sealed for longer service life
- Air valve with integrated filter
- Heavy-duty air motor provides maximum power
- Sealed hydraulic unit prevents contamination
- Built-in safety valve prevents jack from being used beyond its rated capacity
- Additional lifting saddles included

Specifications

1st Stage Lifting Capacity	60,000 lbs. (27,216 kg)
2nd Stage Lifting Capacity	30,000 lbs. (13,607 kg)
Lowered Height	6.5" (150 mm)
Raised Height	6" - 12" (152 mm - 305 mm)
Chassis Width	12.5" (318 mm)
Chassis Length	22.5" (572 mm)
Shipping Weight	113 lbs. (52 kg)
Shipping Dimensions	24" x 13" x 9" (610 mm x 340 mm x 200 mm)
