## Features a Super-Long Lowered Profile of Only 2.75"

The Ranger RFJ-3000LPF low rider super-long garage [floor jack](#) features a lowered profile of only 2.75". At this level, virtually every vehicle that's fit for the road can be serviced with this jack, and the extended 34" long chassis easily reaches the factory-approved jacking points on most low ground-clearance vehicles. Think about the vehicles you own and/or service, and if you own a shop, consider the vast variety you encounter over the course of a single day. It can be difficult to get under certain race cars or sports cars, even when using floor jacks that advertise themselves as being "low-profile." The RFJ-3000LPF doesn't even rise 3" above the ground in its collapsed state, making it one of the most versatile floor jacks ever made.

With a 1.5 ton lifting capacity and accurate direct-drive pump operation, this super-long garage floor jack is the ideal combination of power and precision. Plus, the Ranger RFJ-3000LPF is constructed out of durable heavy steel and employs double-sealed hydraulics to extend the service life, so you know it's built to last. When it comes to floor jacks, manufacturing matters.

## Features

- Long-reach chassis
- Low-profile design accommodates low ground-clearance vehicles
- Swivel casters for easy mobility
- Professional model designed for heavy use
- Direct-drive pump operation for precise control
- Heavy steel construction for maximum durability
- Double-sealed hydraulics for longer service life
- Sealed hydraulic unit prevents contamination
- Safety-overload system
- Flanged side plates for increased strength
