High-Reach Jack Stand Features a 1,650-lb. Holding Capacity

The RJS-1T high-reach [jack stand](#) is essential for any work that will change the center of balance on your vehicle. When heavy pieces of equipment are removed from the vehicle for maintenance, the manufacturer-recommended lift points on that vehicle no longer represent the safest lifting points. To prevent accidentally and detrimental slippage or tipping, a high-reach jack stand is necessary to ensure safety.

Over 80" lets you work with virtually any car lift. When you pull a transmission or engine from a raised vehicle, you change the weight distribution considerably, and with vehicles that high in the air, you need a tool that can reach them with ease. Ranger high-reach jacks are just the tool to keep everything steady. They're also ideal for holding drive-train or exhaust components in position.

Features

- Perfect for holding drive-train or exhaust components in position
- Stabilizes vehicles that are raised on lifts
- Heavy-steel construction for maximum durability
- Quick adjust spin handle with thrust bearing
- Hardened ACME screw for easy adjustment
- Wide base provides maximum stability
- Thick, rubber adjustable pad for maximum support

Specifications

Holding Capacity	1,650 lbs. (748 kg)
Lowered Height	54.5" (1,382 mm)
Maximum Height	80.5" (2,054 mm)
Base Dimensions (dia.)	12" (305 mm)
Shipping Weight	32 lbs. (15 kg)
Shipping Dimensions	53" x 14" x 4" (1,346 mm x 356 mm x 102 mm)
