Features Our Exclusive "Jiggle Jack" Foot Pedal

The RJS-1TF high-reach [jack stand](#) is ideal for holding drive-train or exhaust components in position beneath raised vehicles. It's similar to the RJS-1T high-reach jack stand but features Ranger's own foot pedal technology that helps place the stand exactly where it needs to be during service. This ultra-rugged foot pedal lets you "jiggle" components for quick alignment (that's why we call it the Jiggle Jack). Without this feature, it can be tricky to get jack stands placed exactly where they need to be, especially when maneuvering under a car lift. This revolutionary foot pedal feature lets you stay upright and make all your vertical adjustments by foot, so your hands are free to horizontally position the lift.

The RJS-1TF high-reach jack stand is your perfect in-shop helper for stabilizing a lifted vehicle. The ACME screw adjusts to heights between 54.5" and 80.5," and the thick rubber on the stabilization pads provides maximum support.

Features

- Perfect for holding drive-train or exhaust components
- "Jiggle" foot pedal components allow for quick alignment
- Heavy-steel construction for maximum durability
- Quick adjust spin handle with thrust bearing
- Hardened ACME screw for easy adjustment
- Wide base provides maximum stability
- Thick, rubber adjustable pad for maximum support

Specifications
