## The Original TransJak™ is Still the Best!

The RTJ-1 [transmission jack](#) features a timeless, versatile design and is a must-have in any shop that performs transmission service. We've been excited about the TransJak and auto shops worldwide have loved it ever since, as well.

TransJak's heavy lifting capabilities and top-notch construction make it the transmission service professional's first choice. Remove, transfer and install transmissions, transaxles and other drive-train components with ease. The fully-adjustable/sliding saddle adapts to just about any passenger car and light truck transmission or assembly. Plus, with its heavy-duty chain anchors and fail-safe overload system, you can feel secure—even with all that metal up in the air. It's just one of the reasons why The TransJak® is America's most popular transmission jack.

## Features

- Foot-operated pump
- Two-stage design
- Adjustable saddle tilts two ways
- Heavy-steel construction for maximum durability
- Double-sealed hydraulics to prevent contamination for longer service life
- Heavy-duty chain anchors keep loads secure
- Steel roller bearings are included underneath the table and on the ends of the adjustment screw to minimize friction and allow for effortless table adjustment even when loaded
- Fully adjustable universal saddle adapts to passenger car and light truck automatic transmissions
- Fine-thread adjustment screws with oversized knobs make adjusting the table a cinch
- Two-stage design provides an extended 73" lifting height
- Hardened chrome-moly ram prohibits rust from entering hydraulic system
- Two individual push / pull handles for extra handling
- System overload system prevents the jack from being used beyond its rated capacity
