## The Solution for Turf Equipment Maintenance

BendPak's exclusive turf kit offers a durable, safe and reliable system for virtually every turf lifting application. Powerful and secure, the turf lift accessory kit greatly increases speed and maintenance repair work on all popular sizes of turf maintenance equipment, from large fairway mowers to greens mowers, utility carts, sand groomers, fertilizer sprayers, golf and refreshment carts. Fully adjustable wheel pan and fork assemblies fit a wide array of wheel arrangements.

This turf kit provides open access to the gear box, blades, reels and other essential components, and it all means greater shop efficiency. Easily switch between the turf kit and a standard swing arm assembly to convert your two-post turf lift back into a regular [two-post car lift](#).

The XPR-Series turf kit is a reflection of BendPak's commitment to producing versatile equipment of the highest quality, maximum safety and utmost reliability. Featuring the most advanced engineered technology available in the industry, these turf kits are built to safety standards well above normal OSHA/ALI/ETL requirements. Just like our [car lifts](#), it includes a wealth of features to support the operator's need for performance and security. Our XPR-series is the undisputable industry benchmark that others are sure to copy but never replicate.

Whatever your golf course or grounds maintenance/grooming vehicle requirements, this one turf kit is designed to meet your needs. Even before you start looking at other options, you'll be impressed with our long list of standard features and capabilities that are packed into every two-post lift to which our turf kit adapts.

Here's the bottom line: when you buy BendPak, you can expect a significant boost in performance and life expectancy. In fact, your new turf kit might be the last one you ever purchase. No one surpasses us in quality, consistency or safety. Not now, not ever.
