

IMPORTANT NOTICE ABOUT LEAD WHEEL WEIGHTS

New legislation now makes it illegal to sell, manufacture or install lead wheel weights in many states. Violators can be faced with substantial penalties of up to \$2,500 per day, per violation. Wheel weights made entirely of lead or zinc that end up on the roadway have high potential impacts to human health and the environment compared to steel wheel weights. Steel wheel weights are the preferred alternative due to their comparatively low toxicity and fewer environmental impacts from manufacturing. Lower environmental and human health impacts coupled with the high opportunity for steel wheel weights to be made from recycled material make steel wheel weights the best overall alternative.

Ranger offers a complete line of environmentally conscious steel weights for almost any application. Whether your wheel balancing needs are focused on passenger cars or trucks, Ranger has the right wheel weight for your needs, in stock and ready for immediate delivery.
