

CB-16L

Air Coolers

SKU# 5150151

Portable Evaporative Air Cooler, 110V / 60HZ / 1 Ph*

Small in Size, but Packs a Powerful Punch

If you're looking for the perfect space cooler that delivers precise directional cooling, the Cool Boss CB-16 fits the bill. This space-saving evaporative cooler is made for quiet operation and portability, allowing you to use it indoors or out. Oversize 4" caster wheels allow it to easily roll to wherever you need it most. Just hook it up to a standard garden hose or fill the portable water tank, turn it on, and start cooling.

Featuring a huge 60-gallon cold-water reservoir, the portable CB-16 delivers an almost non-stop supply of chilled air without constant refilling. Airflow is directed through a venturi fan cone that concentrates the air velocity as it passes through, creating a more powerful and directional blast of chilled air. And if you want to direct cool air precisely where you need it most, the CB-16L is compatible with its own Ducting Kit. Easy to install and simple to use, this kit is 15 ft. long and consists of a Flexible Reinforced Polyvinyl Duct. For its diminutive size, the CB-16 packs a powerful punch, delivering an incredible 4950 CFM of air pushing volume with a max area coverage of 1125 square feet.

OSHA law requires that workplaces be free from heat exposure risks. Take care of your employees with a Cool Boss. They'll be happy and healthy and it will only cost about a dollar a day. Can't argue with that right?

When it comes to more bang-for-the-buck features, the CB-16 is chock-full of them. It features an 80W outdoor-rated adjustable floodlight that puts out 4000 lumens of super-bright light which is ideal for lighting up your work area for increased safety and productivity. A built-in Bluetooth® audio player with built-in stereo speakers transforms the CB-16 into a giant boom-box. At the end of the day, you'll be asking yourself... "Is this awesome mighty-mite of cold-blowing awesomeness an air conditioner, work light or radio?" Makes you wonder huh?

Features

- Directional venturi fan cone
- Flexible reinforced polyvinyl ducting kit (optional)
- Blue Flex™ axial-flow fan
- Remote control with a convenient holder
- Automatic water source shutoff
- Honeycool™ evaporative media
- Soft-touch LED controls
- Built-in anion negative ion air purifier
- Antibacterial housing
- Space-saving design
- Water inlet flow control
- LED floodlight
- Built-in timer
- Bluetooth™ audio player
- GFCI plug
- UL® certified
