BendPak Pads are Drop-n'-Go

The round Lift Pad Assembly is the ideal option for any two-post lift that sees heavy action. Included with most two-post lifts, the Lift Pad Assembly is perfect for the majority of your two-post lift needs.

Outfitted with a wear resistant, rubber Polyurethane Tuf-Pad, these heavy-duty adapters were over-designed to withstand heavy-duty projects. The thick Tuf-Pad also protects the underbody from any potential scratches, and its rubber texture gives an extra-grip to the chassis frame of your vehicle. Lift Pad Assemblies come standard with most later-model [BendPak two-post lifts](#), and attach easily to any lifting arm or two-post accessory equipped with 35 mm or 60 mm diameter fastener pegs. This adaptable, versatile, Lift Pad is the only contact pad assembly most two-post lifts will ever need, and will work for nearly any project in your shop.

Features

- Works with BendPak two-post lifts
- Thick rubber construction
- Textured surface for extra grab
- Will not scratch the vehicle
- Easy drop-in design
- 5" diameter for enhanced stability
