Designed to Handle All-Day Use, Seven Days a Week

This 20-ton [shop press](#) was designed for heavy use and works great in both repair shops and your home garage. Ideal for the removal and installation of gears, bushings and bearings, the RP-20T also excels at bending, straightening and flattening. The applications are truly endless.

The RP-20T features both a vertically-adjustable table and a hydraulic pump unit for improved performance, all on a rugged, heavy-steel H-frame. Two heavy-duty arbor plates come included.

Features

- Ideal for pressing bearings, U-joints, etc.
- Hydraulic pump unit for maximum performance
- Adjustable table height
- Heavy steel construction
- Includes 2 heavy-duty press plates
