Monday - Friday, 7AM to 4:30PM PST

When you've got something big and dirty, clean it with Ranger.

Sometimes a product is designed so well, hardly anything needs to change. That's how we felt about the RS-500D parts washer, but we also realized that some car and truck components are just really, really big. In some cases, a larger enclosure means getting more parts washed in fewer cycles. That's why we made the RS-750D, the 53-gallon, 1,000-lb. capacity parts washer to end all [parts washers](#). It stands over 6' tall and has that coveted look of power you want in your shop. It's not just looks, of course. The RS-750D holds twice as much weight as the RS-500D and features a longer spray system to accommodate the increased size.

Specifications

Overall Height	78" (1,981 mm)
Inside Height	54" (1,372 mm)
Inside Width	32" (813 mm)
Turntable Diameter	30" (762 mm)
Tank Capacity	53 gal
Recommended Floor Space	44" x 43" (1,118 mm x 1,092 mm)
Load Capacity	1,000 lbs. (454 kg)
Cycle Timer	0 - 60 min
Brass Nozzles	22
Steel Construction	12 gauge / .109 thickness
Pump Output	70 psi @ 70 gpm
Motor	1 HP / 220 VAC / 60 Hz / 1 Ph
Electric Heater	6 kW
Water Temperature	160° - 180° F (71° - 82° C)
Shipping Weight	960 lbs. (435 kg)
Shipping Dimensions	46" x 46" x 80" (1,168 mm x 1,168 mm x 2,032 mm)
