
BendPak Technical Service Bulletin

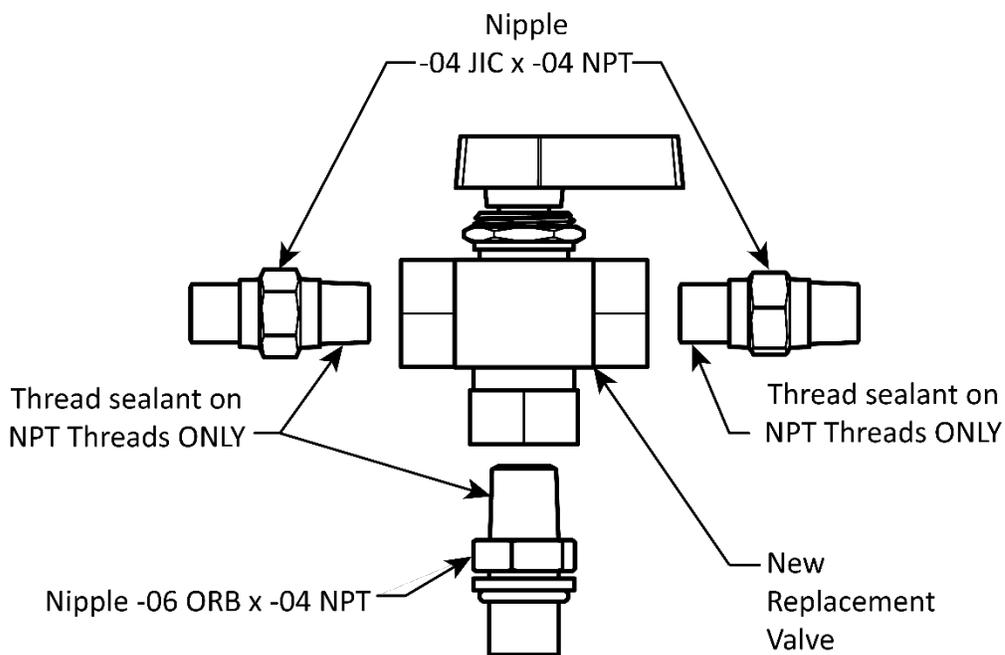

Valve Replacement HD-973

BendPak TSB 95-072022

The purpose of this Technical Service Bulletin is to remove and replace the original three-way Platform Selector Valve. In its place, install the new and better performing, higher psi rated valve enclosed with this TSB. The new replacement valve is designed for increased endurance for the HD-973 application.

Procedure:

Discard the originally supplied 2500 psi Platform Selector Valve from the HD-973 Parts Bag and install the new valve as directed in the installation manual. Apply Thread Sealant to the NPT threads only; no sealant is used on the outer JIC threads.

Technical support and service is available from your dealer, on the Web at bendpak.com/support, by email at support@bendpak.com, or by phone at **(800) 253-2363**, extension 196. You may also contact BendPak for parts replacement information (please have the model and serial number of your unit available) at **(800) 253-2363**, extension 191.
