

BendPak TSB 185 – 102025 2-Post Lifts Screw-Adapter Snap-Ring Removal

This Technical Service Bulletin describes the removal of a snap-ring on the base of the telescoping screw adapters which support the Lift Pads on 2-post lifts using 50 mm pins in their screw adapters. This TSB applies *only* to Telescoping Screw Adapters which occur as part of assembly **5216333**, with **50mm** pins, shipped with some Apex and GrandPrix 2-Post lifts. Confirm whether or not these snap-rings are present on your lift; if yes, follow this procedure to remove them prior to Lift Pad use.

Removal of the snap-ring requires either a pair of snap-ring / circlip pliers or a flat-head screwdriver to pry apart the ring as shown below. Repeat this procedure on all four Telescoping Adapters.

If you experience difficulties with your 2-Post Lift, technical support and service is available from your dealer, on the Web at bendpak.com/support, by email at support@bendpak.com, or by phone at **(800) 253-2363**, follow the prompts to reach service.
